SUMMARY

Detail-oriented **B.Sc. Computer Science** graduate with hands-on experience in **JavaScript, React, Node.js, SQL, Power BI**, and **Excel**. Skilled in responsive UI development, **RESTful APIs**, database management, full-stack features, version control, debugging, and performance optimization. Completed technical projects and internships in **data analytics, dashboards**, and **application development**. Seeking an entry-level **Developer** role.

SKILLS

Web Technologies: HTML, CSS, Node.js, React.js

Programming Language: Java Script

Visualization: Power BI, Excel

Databases: SQL, MongoDB

Tools: Git Hub, Visual Studio Code, Microsoft Office

TRAINEE EXPERIENCE & TECHNICAL TRAINING

MERN Stack Developer Trainee | Maskan Technologies

Sep '25 — Dec '25
Bengaluru, India

- Analyzed application requirements and designed scalable frontend and backend architecture using the **MERN stack**.
- Developed a full-stack **YouTube-like web application** with **React, Node.js, Express.js**, and **MongoDB**, implementing RESTful APIs and **CRUD** operations.
- Built responsive UI components, integrated frontend with backend services, tested **APIs** using **Postman**, and used **GitHub** for version control and **debugging**.

Trainee Recruiter | VDart-GCC

May '25 — Aug '25
Tiruchirappalli, India

- Analyzed job requirements and created Boolean search strings to source qualified candidates.
- Managed and updated large candidate databases ensuring data accuracy and consistency.
- Conducted profile screening and utilized ATS tools to streamline recruitment workflows.

PROJECTS

Personal Portfolio Website (React Application) [Link](#)

- Built a modern responsive portfolio website using **React, Vite**, and **Tailwind CSS**.
- Integrated GitHub repositories, project showcases, and contact forms.
- Optimized performance, SEO, and mobile responsiveness.

Fitness Finance Dashboard (Power BI Project) [Link](#)

- Developed and automated a Power BI dashboard to track membership data, payment status, trainer details, profit, expenses, and revenue.
- Implemented scheduled data refresh for real-time, auto-updating insights and performance monitoring.
- Analyzed member sign-up patterns and revenue trends to support data-driven management decisions.

Healthcare Data Dashboard (Power BI Project) [Link](#)

- Analyzed 3+ years of hospital admission data to identify patterns and optimize resource allocation.
- Built interactive dashboards enabling capacity planning and reduced patient wait times.
- Developed KPIs for specialist allocation and improved staff scheduling efficiency.

CERTIFICATIONS

Full Stack Development, InvoTech Digital Academy

Advanced Power BI Masterclass, Skill Nation

EDUCATIONS

B.Sc in Computer Science, Jamal Mohamed College, Tiruchirappalli (GPA: 7.73)

Jun '22 — Apr '25
